### DETAILED ACTION

#### *Priority*

1. Applicant has complied with the conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120.

#### *Drawings*

2. **Figures 1 and 2** should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).
3. The drawings are objected to because of the following minor informalities:
  - a) On **figure 4**, the arrows pointing towards the "POWER AMP" should be pointed outwards because the signals are being transmitted rather than received; and
  - b) On **figure 8**, one of the occurrences of reference number **2R** should be deleted.
4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference number not mentioned in the description: On **figure 8**, reference number **9R** is not mentioned in the description.
5. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office Action to avoid abandonment of the application. Any amended replacement drawing

Art Unit: 2686

sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended”. If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the Examiner, the Applicant will be notified and informed of any required corrective action in the next Office Action. If a response to the present Office Action fails to include proper drawing corrections, corrected drawings or arguments therefor, the response can be held **NON-RESPONSIVE** and/or the application could be **ABANDONED** since the objections/corrections to the drawings are no longer held in abeyance.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 2686

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. **Claims 1-8** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over **claims 1, 2, 4, 5, 9, and 14-16** of U.S. Patent No. **6,714,800 B2**. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-8 of the present application are a broader version of and are covered by claims 1, 2, 4, 5, 9, and 14-16 of the patent. Since omission of an element and its function in a combination is an obvious expedient if the remaining elements perform the same functions as before (*In re Karlson* (CCPA) 136 USPQ 184 (1963)), application claims 1-8 are not patentably distinct from patent claims 1, 2, 4, 5, 9, and 14-16.
